

**PIOHQI Projects for Collecting and Reporting Data Related to Project Evaluation/ Impact**

**Telling Your Story**—Provide example(s) of activities at an intervention site. For the examples, use the following format:

- a. Name of testing site (learning laboratory) or intervention site
- b. Location
- c. Target population
- d. Medical/dental (oral health) care—description of services provided
- e. Implementation process
- f. Results (number of referrals for dental visits, number of appointments scheduled, number of dental visits)
- g. Next steps

**EVALUATION- The PIOHQI Approach**—Clearly describe data collection and analyses that support an evidence-based/informed approach that will:

- **Increase opportunities for access to oral health care.** Identify the type and number of intervention sites utilized by your PIOHQI project.

Site Type	Number of Testing (Learning Laboratory) Sites	Number of Other Intervention Sites
Federally qualified health center; please list ob/gyn, pediatric, and dental clinics separately		
WIC	20	35
Home visiting		
Community clinic		
Other, please specify (e.g., school-based clinic)		

- **Increase opportunities for training on oral health care, including training on oral health clinical competencies.** Describe changes in providers’ knowledge, skills, and practices.

Type of Provider	Number of Completed Pre-Tests	Number of Completed Training	Number of Completed Post-Tests
Primary care providers (e.g., family physician, pediatrician, nurse practitioner)			
Prenatal care providers (e.g., ob/gyn provider, midwife)			
Oral health providers (e.g., dentist, dental hygienist)			
Other (e.g., CHW)			

- **Increase opportunities for outreach and oral health education.** Describe changes in pregnant women’s knowledge, skills, and practices related to education activities. Suggested format to report information:

Number of Pregnant Women Receiving Education

Activity	Number of Completed Pre-Tests	Number of Completed Training	Number of Completed Post-Tests
Focus group			
Training, in-person			
Training, online			
Webinar			
Other, please specify			

- **Increase opportunities for utilization of oral health care.**

Number of Pregnant Women, Infants, and Children Receiving Oral Health Care

Period of Service	Number of Clients Enrolled in Site	Number of Referrals to Providers for Dental/Oral Health Care	Number Receiving Preventive Dental/Oral Health Care	Number Receiving Restorative Treatment	Number with Treatment Completed
Baseline					

**IMPACT**

- Resources (e.g., publications, tools) that describe the project and its progress
- Resources (e.g., publications, tools) for expanding project efforts
- Trainings (online materials, archived webinars) to educate the target audience
- New or revised policy and practices at the local and/or state level, for example:
  - Development and implementation of professional curricula to promote new knowledge, skills, and practices
  - Changes to site-based procedures or standards of care
  - Changes to policies, including practice acts and service reimbursement
  - Establishment of advisory boards
